## Full Stack Developer

✉ ahmadhss366@gmail.com ☎ +45 91 70 44 11 🌐 Portfolio 🌐 ahmadhss 🌐 Github: ahmadhss366

## PROFILE

I am a Full Stack Developer with expertise in developing responsive and accessible web applications using HTML, CSS, TypeScript, and JavaScript frameworks such as Nextjs, ReactJs, and Angular, and Nodejs, express js, Django (Python) and Nestjs for back-end development. I possess a strong understanding of database management systems, including MySQL and MongoDB, and have experience working with Django Rest Frameworks and version control tools such as Git. I am a results-driven problem solver with excellent time-management abilities and strong attention to detail. Moreover, I am an effective communicator and collaborator with the ability to work in cross-functional teams.

## PROFESSIONAL EXPERIENCE

### Lead Web Developer

Pwrlabs

07/2023 – 07/2024

Dubai, Emirates,  
Remote

- Ensure high-quality frontend development.
- Deliver projects on time.
- Collaborate with UI/UX designers and backend developers.
- Optimize web applications for maximum speed and scalability.
- Implement responsive design for various devices.
- Integrate blockchain technologies into frontend applications.
- Debug and resolve frontend issues efficiently.

### Web Developer

## EDUCATION

### Bachelor Degree in Computer Science

American University of Science and Technology

10/2018 – 06/2022

## BOOTCAMP

### Full Stack Development

The Lebanese Association for Scientific Research (LASeR)

04/2023 – present

Tripoli, Lebanon

Gain hands-on experience in Django Python framework and ReactJS framework to become proficient in both frontend and backend web development.

- Learned data modeling, URL routing, and user authentication using Django and integrate databases and create APIs
- Equipped with the ability to create full stack web applications integrating Django and ReactJS

## PROJECTS

---

### PWR Wallet

PWR Wallet - Frontend

- Engineered a browser extension using React and Plasmo framework for seamless interaction with PWR Chain and decentralized applications (Dapps).
- Integrated Ether.js for secure transaction signing and asset transfers, enhancing user experience within blockchain ecosystems.

### Explorer PWR Chain

PWR Explorer - Frontend Developer

- Developed a comprehensive blockchain explorer for PWR Chain utilizing Next.js and React, enabling real-time inspection of blocks, transactions, and addresses.
- Facilitated enhanced user interaction with blockchain data, providing a transparent and efficient gateway to monitor network activity.

### Stacking PWR Chain

PWR Staking - Frontend

- Implemented a staking interface for PWR, enabling wallet connectivity and user participation in network validation processes.
- Leveraged web3 technologies to facilitate a secure and user-friendly staking experience within the PWR ecosystem.

### PWR Chain Community

#### Job Nexus AI

- The goal of this project was to reduce the workload on the HR department using AI that automatically analyzing a candidate's CV when they apply for a job. using React and Django Technologies and Machine Learning Model.
- The analysis of a candidate's CV currently takes seconds.

#### DAC Management and Accounting System

- Implemented a Python-based backend using the Django framework to handle user authentication, device management, and accounting functions.
- Automated the calculation and reporting of key financial metrics, reducing manual workload

#### MERN Stack Tours & Travels Booking Website

- User Authentication and Authorization.
- Booking Forms, Payment Gateway Integration, User and Admin Dashboards, MongoDB Database.
- Responsive Design and RESTful API Design.
